Plant Height: 12 inches

Flower Height: 16 inches

Spread: 16 inches

Spacing: 15 inches

Sunlight: ○ ◐

Hardiness Zone: 4a

Other Names: Summer Phlox

Group/Class: Flame Pro Series

Description:

An early flowering variety, producing blooms of fragrant, cherry red flowers with rose eyes, on compact plants suitable for the front of borders; provides a long season of color; thick, glossy green foliage has excellent mildew resistance

Ornamental Features

Flame Pro Cerise Garden Phlox features bold clusters of fragrant cherry red round flowers with rose eyes at the ends of the stems from late spring to late summer. The flowers are excellent for cutting. Its attractive small glossy pointy leaves remain forest green in color throughout the season.

Landscape Attributes

Flame Pro Cerise Garden Phlox is a dense herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It is a good choice for attracting butterflies and hummingbirds to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Flame Pro Cerise Garden Phlox is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Flame Pro Cerise Garden Phlox will grow to be about 12 inches tall at maturity extending to 16 inches tall with the flowers, with a spread of 16 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 15 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Flame Pro Cerise Garden Phlox is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
